

40 lb

Preserving Shape, Sealing in the Freshness

Block Pouches

Gusseted or regular bags work trouble free on your manual or automatic towers

Overview

A pioneer in pouch design, Plastopil manufactures 40 lb block pouches specially designed for vacuum packaging of non-maturing cheese (i.e. cheddar) that enable the traditional look and feel, while preserving the quality of the cheese.

These special pouches combine a correct barrier level for optimizing the shelf life of each cheese with a strong seal and mechanical properties.

Technology

Plastopil's films are made using nine-layer co-extrusion blown film technology. Each layer is specifically designed to achieve different properties. We also put extra care into the pouch creation stage, paying specific attention to required dimension and shape, assuring a superior quality.

The 40 lb pouches come in two versions: regular (suitable for manual loading) and gusseted (for both manual and automatic loading on CL20 machines).

Features & Benefits

- Maintains smooth outer surface and sharp corners of the cheese block – minimizing cheese waste
- Gusseted pouches specially designed for CL20 automatic towers perform with minimal machine stoppage
- Gusseted pouches may be re-gusseted at the RG-20 re-gusset machine that folds and prepares the bag for vacuum seal
- Pouches have specific texture and color that can be easily detected by automatic camera used to identify vacuum seal
- Gusseted pouches can also work on manually loaded cheese towers to maintain the block shape of the cheese and to decrease waste
- Excellent sealing properties through product residue or film wrinkles
- Outstanding strength and mechanical properties that minimize leakers
- High barrier structure extends product's shelf life
- Designed to suit a vast range of cheese types from low-fat to high-fat content, from high-moisture to low-moisture content and from high texture to low texture
- Pouches are provided in easy-to-open, two-piece carton boxes that protect the pouches during transportation

Product Range

PRODUCT	TYPICAL DIMENSIONS* (mm)	THICKNESS MICRON (mil)		Color
PLASTOBARR HB M 75	479 X 635	75	(2.95)	Blue/Clear
PLASTOBARR HB M G 80	Gusseted 277X190X650 277X190X635 277X108X545	80	(3.15)	Blue/Clear
PLASTOBARR HB M G 100	Gusseted 277X190X650 277X190X635	100	(3.94)	Blue/Clear
PLASTOBARR HB	277 X 190 X 635	80	(3.15)	Blue/Clear

* Can be supplied at different sizes
