

Pouches for Swiss Cheese

Sealing in the Unique Quality of Swiss Cheese

Specially designed to achieve optimal eye formation of Swiss cheese

Overview

Did you know?

Plastopil is one of the world's largest producers of barrier pouches, manufacturing over 100 million pouches per year. Manufactured using advanced technology, our products highlight the traditional look and feel of Swiss cheese, while preserving its unique quality and taste.

About Swiss Cheese Packaging

Swiss cheese pouches are specially designed for vacuum packaging of Swiss cheese throughout its maturing process. The pouches play a critical role in preventing mold growth during the maturation and achieving optimal eye formation and flavor. In addition to the appropriate barrier, the pouch also has an excellent moisture barrier which improves the product yield by preventing excessive weight loss.

Features & Benefits

- Specially designed structure prevents mold, controls the desired eye size and maintains moisture inside
- Maintains smooth outer surface of the cheese block and minimizes cheese waste
- Excellent seal properties through product residue or film wrinkles
- Outstanding strength, mechanical properties and abrasion resistance that minimize leakers
- High barrier structure extends product's shelf life preventing O₂ from penetrating, but allowing CO₂ to exit so the bag will not swell from gas accumulation

Technology

Plastopil's films are made using nine-layer co-extrusion blown film technology. Each layer is specifically designed to achieve different properties. We also put extra care into the pouch creation stage, paying specific attention to required dimension and shape, assuring a superior quality. Our film is environmentally friendly and provides high barrier protection without the use of PVDC and with chlorine-free materials.

Applications

Suitable for all vacuum pouching machines used in the industry

- Maintains the O₂ and the CO₂ transition rate even at different humidity conditions
- Wide range of sealing temperatures
- Pouch sizes:
 - 39" X 49" (990 X 1245 mm)
 - 31.5" X 47" (800 X 1195 mm)

Swiss cheese pouches can be ordered clear or blue tinted, and in different sizes and thicknesses

Product Range

PRODUCT	BARRIER LEVEL	THICKNESS UM (mil)		COLOR
PLASTOBARR HB SW	High	110	(4.33)	Clear
PLASTOBARR HB SW Blue	High	110	(4.33)	Blue
