

# Taribo

## Maintaining Day-One Freshness

Specially formulated bag packaging solution to slow down the metabolism of fresh produce, prevent fast decay and maximize shelf life

### Overview

Now more than ever, customers want the convenience of buying an assortment of healthy, fiber-rich, garden-fresh produce to feed instantly to their families. What used to be a marginal trend is now a widespread and growing purchase pattern. Fortunately, we've perfected the packaging for fresh produce. Our highly transparent films allow you to show off your high-end vegetable blend, whether ready to cook or serve.

### Features & Benefits

- Optimal film for Controlled Atmosphere Packaging – gas and moisture permeability meet different types of vegetables and salad mixtures needs
- Designed to slow down the metabolism of fresh produce and prolong its shelf life
- Excellent machinability and sealability
- Ideal transparency, optical and anti-fog qualities for flawless shelf display
- Package printability transforms a simple film into an opportunity to engage with customers

### Technology

Plastopil's Taribo film is specifically engineered for Controlled Atmosphere Packaging (CAP) of fresh produce and formulated to maximize the shelf life of the product. Taribo slows down decay and maximizes shelf life by controlling the rate of oxygen entering the package, as well as the carbon dioxide level inside the package.

### Applications

Suited for automatic Vertical Form Fill & Seal (VFFS) packaging (flow packs) machines

Also available as ready-made pouches

### Food Segments

Fresh whole, peeled and sliced vegetables and fruits, salad mixtures containing lettuce, cabbage, spinach, carrots

## Product Properties

PRODUCT	THICKNESS RANGE (micron)	BARRIER	TYPICAL APPLICATIONS
TARIBO	60	Permeable	Ready-made bags
