

Toplex/Topaz RC (Reclosable)

One Easy Package

Reclosable lidding perfect for multi-serve foods that demand high functionality

Overview

Did you know?

20% of household foods are wasted before consumption. Waste costs businesses more and more every year in taxes. Now, businesses are looking for ways to reduce their environmental impact.

Plastopil's Toplex/Topaz RC concept was designed to provide the consumer with an easy-to-open, reclosable package preserving product freshness, while reducing food waste.

Plastopil's Toplex/Topaz RC also delivers a source reduction for businesses due to elimination of the need for secondary barrier films and labels compared to multi-component rigid trays and lids systems.

Features & Benefits

- Excellent film flatness and stiffness — allows clean pack opening and easy reclosing
- Consistent package opening with a reliable clean peel
- High clarity and gloss — shows and sells products
- Reverse printed for superior retail presence
- Excellent sealing properties to PE or APET trays — providing a hermetic seal
- High oxygen barrier — delivers long shelf life, minimizes waste
- Wide seal temperature range — for production versatility
- Environmentally friendly solution:
 - PVDC free film
 - Maintenance of product freshness, reduction of packaging and food waste
 - Delivers source reduction compared to multi-part tray and lid systems
 - Topaz RC (for APET trays) is available with Anti Fog

Applications

Suitable for all PTLF (pre-formed tray and lidding film) and TFFS machines using rigid APET sheets, with or without MAP capabilities
